

Sphere 0.2-2.8mm Bearing Steel Grit For Peening, Descaling, Polishing, Cleaning

Specifications :

Price	Contact Us
Place of Origin	Shandong, China
Payment Terms	T/T, L/C, Western Union, etc.
Delivery Detail	10-25 Working Days.
Keyword	Steel Angular Grit

Detail Introduction :

Bearing Steel Grit

G10/G12/G14/G16/G18/G25/G40/G50/G80/G120

GH GL GP grade

Bearing Steel Grit, it's much different with cast steel grit, it's cracked from Ball Bearing scraps with heat treatments. This kind of steel grit has no cambered surface, efficiency higher than common cast steel grit for stone cutting. And also this bearing steel grit contain Chrome 0.6-1.6%, much more wear resisting during stone cutting!

Specification:

Product		BEARING STEEL GRIT GH/GL/GP10-120
Chemical Composition %	C	0.80-1.20
	Mn	0.20-1.20
	Si	0.15-1.20
	S	?0.05
	Cr	0.60-1.60
	P	?0.05
Hardness (HRC)		60-66(GH) 50-60(GL) 40-50(GP)
Density (g/cm3)		7.4
Durability		2000-2800 times
Metallographic Structure		Fine and Homogeneous Tempered Troosite
C Level		<2
