

white fused aluminium oxide

Specifications :

Price	Contact Us
Place of Origin	Shandong, China
Payment Terms	T/T, L/C, Western Union, etc.
Delivery Detail	10-25 Working Days.
Keyword	white fused aluminium

Detail Introduction :

Product Description

White fused alumina/aluminum oxide/alumina oxide/corundum

White Aluminum oxide, a kind of high-grade refractories, was made from the high quality alumina by melting above 2000 in the electric arc furnace and cooling. It is white with the main crystal phase alpha-Al₂O₃. The white alumina produced in titling electric arc furnace has the advantage of high bulk density and low porosity and the volume stability and thermal shock resistance can be improved.

Product Name	White fused alumina/aluminum oxide/alumina oxide/corundum
Material	Aluminum oxide
Color	white
Standard	FEPA JIS
Grade	A
Bulk Density	1.75-1.95g/cm ³
Specific Gravity	3.95g/cm ³
Mohs Hardness	9.0
Brand	Haixu Abrasives
Used	Refractory, castable, blasting, grinding, lapping, surface treatment, skin care, polishing

Note: Size as per customer's requirement.

Main Application

1	Bonded abrasives and Coated abrasives
2	Surface treatment/finishing
3	Lapping, polishing, decorative non-skid tile, and pressure blasting.
4	Ceramic Tiles special ceramics
5	Fluidized Bed Furnaces and Skin / Dental Care
6	Grinding high carbon steel, high-speed steel and chilled steel

Packing: 1 MT big bag or 25kg paper bag on one pallet; As per customer's requirement
