## Detail Introduction :

### Product Description

#### White fused alumina/aluminum oxide/alumina oxide/corundum

White Aluminum oxide, a kind of high-grade refractories, was made from the high quality alumina by melting above 2000 in the electric arc furnace and cooling. It is white with the main crystal phase alpha-Al<sub>2</sub>O<sub>3</sub>. The white alumina produced in titling electric arc furnace has the advantage of high bulk density and low porosity and the volume stability and thermal shock resistance can be improved.
