Place of Origin	Shandong, China
Payment Terms	T/T, L/C, Western Union, etc.
Delivery Detail	10-25 Working Days.
Keyword	Garnet Sandblasting

Detail Introduction :

Garnet Abrasive

Garnet is a natural mineral abrasive which is irregularly shaped with polished edges, it contains no heavy materials and has a low level of free silica. Because garnet is very heavy and hard for a mineral abrasive it accomplishes a fast cleaning or cutting rate. Our garnet is the abrasive of choice for water jet cutting and blasting applications. Some of the advantages of garnet are; fast cleaning and cutting, relatively low dust generation as compared to copper- or coal slag, environmental friendly and re-usability.

Product Description

1. Type: Garnet abrasive, Garnet sand, river/alluvial/sea garnet sand (Also supply almandine garnet sand)
2. Size: 30/60mesh, 80mesh and etc
3. Certification: ISO9001, SGS
4. Application: sand blasting

Product Name	Garnet 20/40 Mesh for Sandblasting		
Colour	Red	Hardness	7-8 Mohs
Fracture	Sharp	Specific Weight	3.9g/cm ³
SiO ₂	41.64	Melting Point	1300?
Fe ₂ O ₃	3.05	Al ₂ O ₃	18.77
CaO	4.48	MnO	0.42
Na ₂ O	0.30	FeO	21.62
TiO ₂	0.58	K ₂ O	0.19
P ₂ O ₅	0.074	LOI	-1.52
MgO	7.22	Chloride	10-15ppm(25ppm max)

Packaging

25 kgs/bags 40 bags / big bag or pallet
1000 kgs / big bag

Our Company:

It is a professional production and processing of shot blasting machine, shot blasting machine accessories and other products of the company, has a complete and scientific quality management

system.

Workshop:
