

Orientation set Control Cage Separating wheel impeller

Specifications :

Price	Contact us
Place of Origin	China
Min.Order Quantity	1
Payment Terms	L/C, T/T, Paypal
Supply Ability	1000
Delivery Detail	3days--7days

Detail Introduction :

Introduction

In recent years, there has been an increase in the use of orientation set control cage separator (OSS) impellers in various industries. This type of impeller is used to improve the separation performance of slurry streams in various industrial applications. In this blog post, we will introduce and discuss the application of OSS impellers.

Application

The Orientation set Control Cage Separating wheel impeller is a new type of blade in the waterjet industry. It uses the principles of aerodynamics, hydrodynamic and orientational stability to achieve high efficiency and stable cutting performance. The cage separates the blade from the rotating wheel to improve controllability and cut quality.

Our Company:

It is a professional production and processing of shot blasting machine, shot blasting machine accessories and other products of the company, has a complete and scientific quality management system.
