

carbon steel cut wire shot

Specifications :

Price	Contact Us
Place of Origin	Shandong, China
Payment Terms	T/T, L/C, Western Union, etc.
Delivery Detail	10-25 Working Days.
Keyword	Cut Wire Shot

Detail Introduction :

Steel cut wire shots are used in many industries, like shot Peening, finishing, blasting, rust removing, surface cleaning etc. No pollution, recycle, durability, As the goods no need acid picking treatment, meet the requirements of environmental protection.

The size of Steel Cut Wire Shot : CW1.0mm, CW1.2mm, CW1.5mm, CW2.0mm, CW2.5mm, CW3.0mm

Technological Index

Products	Cut Wire Shot	
Chemical Composition	C	0.45~0.75%
	Mn	0.40~1.20%
	Si	0.10~0.30%
	S	<0.04%
	P	<0.04%
Microhardness	1.0mm:51~53 HRC(525~561HV) 1.5mm:41~45 HRC(388~436HV)	
Hardness Deviation	Max Deviation ± 1.0 HRC or ± 40 HV	
Tensile Intensity	1.0mm:1750~2150 Mpa 1.5mm:1250~1450 Mpa	
Microstructure	portrait Landscape even deformed perlite	
Density	7.8g/cm	

FAQ:

Q1: How long does it take on average to develop a sample?

A: Generally, samples will be finished within 5 working days after received your sample fee.

Q2: What is the production time?

A: Production time are different from different products, the production time is 15-30days after sample approval and receiving your deposit.
