

Blasting Media Zinc Shot

Specifications :

Price	Contact Us
Place of Origin	Shandong, China
Payment Terms	T/T, L/C, Western Union, etc.
Delivery Detail	10-25 Working Days.
Keyword	Zinc Shot

Detail Introduction :

Zinc cut wire shot - As Cut or Conditioned

Zinc shot is made with the process of drawing, cutting and conditioning etc.. And they are used for deburring and cleaning on various Aluminum alloy, Zinc die castings. Because their specific gravity is close to steel and the hardness is low, the deburring can be performed without wearing the products' surfaces. Otherwise distinguished from Aluminum abrasive, the security is nice for much lower kindling point of the dust. And they are also characterized at obvious whitening on the surfaces of the work pieces.

Chemical composition of zinc shot

Product	Grade	Chemical composition (%)					Density	Hardne
		Zn	Fe	Al	Cu	Co		
Zinc cut wire shot - G3 Conditioned	0#Zn	99.99%	0.004%	0.003%	0.001%	0.003%	7.1g/cm ³	45-60H
Zinc cut wire shot - As Cut	0#Zn	99.99%	0.004%	0.003%	0.001%	0.003%		35-55H

Size Available:

0.6, 0.8, 1.0, 1.2, 1.5, 1.7, 2.0, 2.3, 2.5, 3.0 mm

Application

marin
shipbuilding

aerospace

Marine engineering
equipment

rail transit

construction
engineering
