Detail Introduction :

Zinc cut wire shot - As Cut or Conditioned

Zinc shot is made with the process of drawing, cutting and conditioning etc.. And they are used for deburring and cleaning on various Aluminum alloy, Zinc die castings. Because their specific gravity is close to steel and the hardness is low, the deburring can be performed without wearing the products' surfaces. Otherwise distinguished from Aluminum abrasive, the security is nice for much lower kindling point of the dust. And they are also characterized at obvious whitening on the surfaces of the work pieces.
