Place of Origin	Shandong, China	
Payment Terms	T/T, L/C, Western Union, etc.	
Delivery Detail	10-25 Working Days.	
Keyword	Zinc Shot	

Detail Introduction:

Zinc cut wire shot - As Cut or Conditioned

Zinc shot is made with the process of drawing, cutting and conditioning etc.. And they are used for deburing and cleaning on various Aluminum alloy, Zinc die castings. Because their specific gravity is close to steel and the hardness is low, the deburing can be performed without wearing the products' surfaces. Otherwise distinguished from Aluminum abrasive, the security is nice for much lower kinding point of the dust. And they are also characterized at obvious whitening on the surfaces of the work pieces.

Chemical composition of zinc shot

	enemiear composition of and chor											
Product	Grade	Chemical composition (%)					Danaitu	Llordocco				
		Zn	Fe	Al	Cu	Со	Density	Hardness				
Zinc cut wire shot - G3 Conditioned	0#Zn	99.99%	0.004%	0.003%	0.001%	0.003%	7.1g/cm ³	45-60HV				
Zinc cut wire shot - As Cut	0#Zn	99.99%	0.004%	0.003%	0.001%	0.003%		35-55HV				

Size Available:

0.6, 0.8, 1.0, 1.2, 1.5, 1.7, 2.0, 2.3, 2.5, 3.0 mm

Our Company:

Zibo Yalong Abrasive Co., Ltd, established in 2007, based in Zibo City, Shandong Province, is a leading manufacturer of metallic abrasives. We produce high quality Steel Shot, Steel Grit, Steel Cut Wire Shot, Stainless Steel Cut Wire Shot etc.
